

Student Voices on Discrimination Clip 2 Transcript

Speaker 1: Personally, I have not experienced any discrimination, but I do know people who have experienced discrimination because they were a part of a certain club. What people have to understand is that just because you're a part of certain club it doesn't necessarily mean you are a part of that culture or that group of people. You just may want to learn more about it or help.

Speaker 2: Personally, I haven't been discriminated for the clubs I've been in. If anything, people have congratulated me in a way. They've been like, "Oh it's really good that you're coming here even if you're not a part of this group. It's nice to know people support the group". It's nice to know that even if the group doesn't apply to them there are still people you can go to. That it is still supportive of the people that it does affect.

Speaker 3: I don't really think I've experienced anything bad from the club. I know people might see it as "oh you're part of the social justice club - you're trying to be some kind of angel type of thing". From my friends or people who are acquaintances, none of them has said anything bad. It's nice because when you go to their classes they actually listen to you with respect, they don't talk in between. Fortunately I haven't.
