

## **Students Learned About Themselves Clip 12 Transcript**

Speaker 1: I learned that there are a lot of things that I can improve on. Some things I was pretty competent about myself. But I realized there are a lot of ways that I can improve. There are always people that are better than me. And at the same time you can learn a lot from other people and the way they do things. So I learned a lot of different ways to do one thing. So it really helped me expand my experience and learning skills.

Speaker 2: For me, growing up I had a very sheltered childhood. I didn't know very much about the world. I didn't have access to different books. I didn't know very much about the world. Just that was how I was raised. So coming into High School I really wanted to find something that was different, something that was for me. Joining these clubs really helped kind of find something that was separate from my family. That I could actually learn about the world and see that what I'm interested in can actually do something positive for someone else with a group of people. That's helped out.
