

Student Voices on Discrimination Clip 6 Transcript

Speaker 1: Uh, no I haven't been discriminated in my group. I've told a couple of people about it and they say "Cool, what's it about?" And just carry on from there.

Speaker 2: Um, no I have never personally been discriminated against. People do say certain remarks but it just doesn't get to me. So, I don't really consider I've been discriminated against because I don't really care what their opinions are. And I learned that others have their own thoughts and beliefs and I don't really consider it being, like, frowned upon.

Speaker 3: I also haven't been discriminated against but when I tell my friends I'm going to Christian club, like, they kind of have their own opinions on it, but like, that's alright. And then I find that other people that I tell about the Christian club; I also encourage them in a way. And they also feel that they can participate as well.

Speaker 4: I haven't been discriminated through joining the Christian club. But certain people are, like, really stereo typical and they're like, "Oh, you're going to pray and read the Bible." And basically like, I try and like, help them like, know that we don't just do that. We help others. We like, feel the need to say, like, you don't have to go to the Christian club to help others. You can help others by going to church and stuff and basically just, like, let them know what Christian club is about, that it's not just some stereotypical club.
